DETAILED ACTION

Election/Restrictions

Newly submitted claim 52 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The inventions as claimed are independent since they are not connected in design, operation or effect, i.e., each invention is separately usable and the operation, design and effect of one is independent of the other.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 52 stands withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-15, 34 and 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was

filed, had possession of the claimed invention. There is no support in the original specification for the following amended claim language: "wherein the frying vessel may form therein a frying oil layer meeting a relationship of.....the frying oil layer" (claim 10, lines 5-10), etc. This is a new matter rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-15, 34 and 35 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2000-271018. The structural features of the instantly rejected claims are structurally met by the reference. While features of an apparatus may be recited either structurally or functionally, claims directed to an apparatus must be distinguished from the prior art in terms of structure rather than function. In re Schreiber, 128 F.3d 1473, 1477-78, 44 USPQ2d 1429, 1431-32 (Fed. Cir. 1997) see also In re Swinehart, 439 F.2d 210, 212-13, 169 USPQ 226, 228-29 (CCPA 1971); In re Danly, 263 F.2d 844, 847, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." Hewlett-Packard Co. v. Bausch & Lomb Inc., 909 F.2d 1464, 1469, 15 USPQ2d 1525, 1528 (Fed. Cir. 1990). A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art

Art Unit: 3742

apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-15, 34 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Oiwa (US 5,184,539), Moore, et al. (US 4,287,818), Koopman (US 4,854,227) or Cahlander, et al. (US 4,922,435). The prior art patents each disclose a prior art fry cooking device along with a frying ingredient carrier having a lift mechanism. It would have been obvious matter of design choice to have the prior art frying vessel have a shape longer in the vertical direction than in the lateral direction, since the invention would perform equally well. It would have been further obvious to one having ordinary skill in the art at the time the invention was made to have the four sidewalls and single bottom wall satisfy a relationship of $HB/SB = 1.1-3.0$, where SB denotes an area of an open portion of the vessel, and HB denotes the depth of the vessel, wherein the frying vessel may form therein a frying oil layer meeting a relationship of.....the frying oil layer, since where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. Regarding claim 34, an ingredient carrier of the prior art is

capable of holding flat frying ingredients such that a flat surface of the frying ingredients makes an angle of 45 to 135 degrees with a horizontal plane.

Response to Arguments
